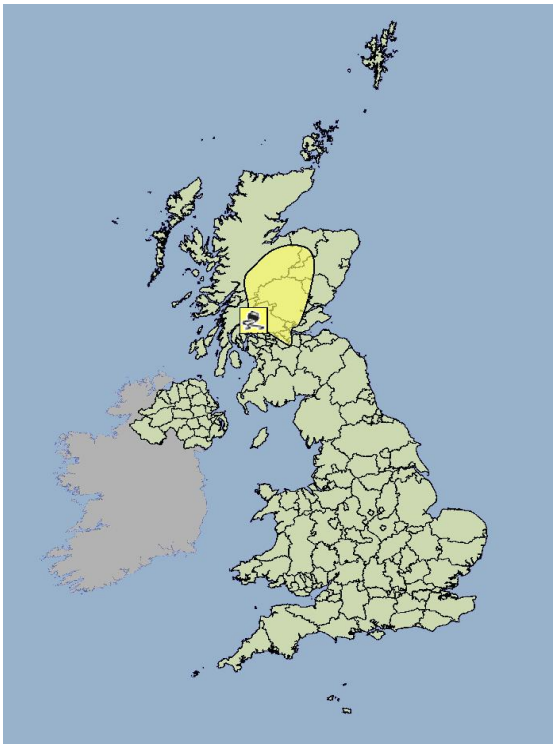
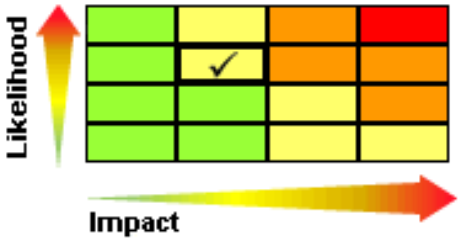
National Severe Weather Warning Service





Chief Forecasters Assessment
Continued sleety showers and temperatures hovering around, or just below zero, could lead to some locally tricky travel conditions this evening, particularly for higher ground. Showers should ease later this evening, with ice likely to prove a lesser problem by morning.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **16:00 on Mon, 26th Dec 2016** until **21:00 on Mon, 26th Dec 2016**

Although the gales and squally, wintry showers are now beginning to ease, please be aware of the likelihood of some ice forming through the evening as temperatures fall.
